Education

Punjab Engineering College, Deemed to be University

Aug 2023 – May 2027

B.Tech in Electrical Engineering | CGPA - 8.08

Chandigarh, India

*Minor Specialization in **Computer Science Engineering***

Professional Experience

Scriptivox |  Verify

Mar 2026 – Jun 2026

Full Stack Developer Intern

Remote

- Migrated a bot application from embedded (Raspberry Pi) infrastructure to cloud, rebuilding core services for scalability
- Designed relational schema and managed SQL migrations on Supabase/PostgreSQL, including Row-Level Security policies
- Worked across hardware, backend, and frontend stacks (Python, React, REST APIs) to deliver a production-ready application
- Investigated platform security mechanisms, API rate-limiting, and bot detection evasion strategies

Apache Software Foundation - Apache Maven |  GitHub

Jan 2026 – Feb 2026

Open Source Contributor

Remote

- Implemented a CLI enhancement for time zone configuration
- Feature accepted and merged in Apache Maven core
- Backported to the 4.0.0 stable branch
- Added unit tests and followed Apache release standards

Apache Software Foundation - Apache Seatunnel |  GitHub

Feb 2026 – Mar 2026

Open Source Contributor

Remote

- Developed an MQTT sink connector for Apache SeaTunnel, implementing core connection lifecycle management and robust fault-tolerance mechanisms.
- Engineered comprehensive E2E test suites to validate real-world message delivery and reliable data streaming to external brokers.
- Managed the automated CI/CD build process, resolving checkstyle and integration failures to meet strict Apache open-source standards.
- Collaborating actively with project maintainers to finalize the pull request for future merge.

Projects

sLime (In Progress) | React.js, Socket.io, P2P Mesh Architecture |  GitHub

March 2026

- Built a browser-based video conferencing platform (sLime Meet) using WebRTC for real-time P2P communication
- Built a modular React/Vite frontend with a pub-sub pattern for scalable data flow
- Created a Node.js/Express/Socket.IO signaling server with SQL-backed schema for room and session data
- Designed custom state management linking React, WebRTC, and WebSockets for smooth media handling

Instagram Media Automation Tool | Python, Instaloader API |  GitHub

June 2025

- Built a script-based tool to download media and metrics from public Instagram profiles
- Stored scraped data in a SQL database with a custom relational schema
- Trained a lightweight ML model on engagement data to surface content trends
- Used Instaloader for structured data extraction, replacing unsafe third-party tools

Skills

- **Programming Languages:** Java, Python (intermediate), JavaScript, SQL (MySQL, PostgreSQL)
- **Frameworks & Web Technologies:** React.js, Next.js, Node.js/Express (basic), RESTful APIs
- **Cloud & AI Tools:** AWS Fundamentals (EC2, S3, IAM), GitHub Copilot, ChatGPT-assisted development
- **AI & LLM :** Agentic AI, Retrieval-Augmented Generation (RAG), LangGraph, Model Context Protocol (MCP), Agent-to-Agent (A2A)
- **Core Fundamentals:** Data Structures & Algorithms, DBMS, Computer Networking, Computer Organisation and Architecture
- **Developer Tools & DevOps:** Git/GitHub, Docker, CI/CD, Agile, Software Testing
